

MUST READ

It's a matter of pride for CIIT that one of its researcher, **Dr.Rani Faryal (Associate Professor)** from the **Department of Biosciences** has **published a book**

Bioremediation of Heavy metal ions **and** **Organic pollutants by Microbes**

This book is a useful insight for students, environmentalist and law makers. In this book Environmental pollution is assessed in a local textile industry along with detailed description of methods, protocols and techniques to carry out successful study of land degraded through industrial waste. It also elaborates the utilization of microbial biomass for removal of metals from industrial waste waters.
